SEWING MACHINES
 THE PERFECTION OF SCIENTIFIC
 arrangement and mechanical simplicity
 is attained by the
GROVER & BAKER
 Sewing Machine Company,
 IN THEIR IMPROVED
NOISELESS MACHINES.
 They have the following advantages over
 all others: They have no parts to keep in
 order; no bobbins to wind; no tangling or
 waste of thread; no oiling the thread or
 work; no tool chest stocked with wrenches,
 pliers, pickers, leather, &c., &c.
 The directions are simple, easily under-
 stood and easily explained by the instruc-
 tors. There is no taking apart for cleaning
 or oiling. They require about ten drops of
 oil per day, when in constant use. They
 make no more noise than a common clock,
 when making fifteen hundred stitches per
 minute. They run easy—a child of ten
 years old can work them to full speed. They
 run fast or slow, without any danger of al-
 tering the length or tightness of the stitch.
 They will HEM, FILL, GATHER, BIND,
 STITCH AND EMBROIDER, in so superior
 a manner that we challenge comparison.—
 The same Machine will sew pavilion gauze
 and plantation goods. The seam is elastic
 as the most elastic fabric, and will not break
 in washing or ironing. The same Machine
 runs silk, in thread and common spool
 cotton, with equal facility. The needles are
 shorter, and there is stronger than any
 other high or low pr. of Machine. That
 they are superior to all others is evident from
 the fact of their having been thirty thousand
 Machines made and sold, in competition with
 others already in successful operation. The
 question is no longer which is the best ma-
 chine, but which of the numerous patterns of
 GROVER & BAKER shall I take.

PRICES, \$50 TO \$130.

 celebrated Machines, 240 King-street,
